

HOW TO ORDER YOUR CUSTOM BOARD

START

We can make the board you've always dreamed of! That is why we give extra options, so you can customize your board however you want to. Pick your favorite color, fins or make your board even stronger with a double sandwich layer!

1. MODEL + SIZE

Choose your favorite model from the stock sizes. Of course everyone is different so we can make boards in custom dimensions as well.

- Appleflap
- Appleflap noseless
- Applino
- C.O.P
- Klokhous
- Klokhous noseless
- .Luke's Leaf
- Malus Domestica

2. CONSTRUCTION

The standard kite construction will suit most riders, but you can go for a lighter and more flexible construction in kite-lite or 'S' glass. Or you can go ultra luxury with our full carbon constructions for the ultimate ride.

- S glass (only for Kite-lite)
- Hex-Skin Glass
- Hex-Skin Carbon

3. REINFORCEMENT

All boards come in Kite strength + as standard. Order your board lighter or stronger to match your needs and preference. The Kite-lite is not recommended for riders over 80kg.

- Kite-lite
- Kite strength +
- Kite strength ++

7. READY TO ORDER!

Place your order at Appletreesurfboards.com or at your local dealer. Most of the options can be filled in online, for custom requests feel free to contact us. Please allow around 4-6 weeks for production, this differs through the season. We will gladly inform you about current production time.

6. INSERTS AND/OR FOILBOXES

We can add inserts for foot straps on all boards! Just send us your required stance and we will place the inserts in the perfect position. Same as for the foilboxes. Just let us know and we will fix it! And if you like we can add deck pads to the board, we always have a wide selection to choose from.

- Inserts
- Foilboxes
- Deck pad

5. FINS

You can order both Futures and FCS-2 boxes in your board, whatever you prefer. All boards have 3 or 5 boxes as standard, but you can add or remove boxes as you like. We also offer matching fin sets to complete your board!

- Futures
 - FCS-2
-

4. COLOR

All color is added to the epoxy resin. The color is transparent so you can see right inside the board! Each board is custom mixed, so no board is the same. Slight color differences are normal. In carbon boards the colors are added to the deck filler layer. The carbon base is black so the color will come out darker. The standard color is white.
